

HELLO

NOT

IMario

1 in 6 people

15 to 20%

**2 Billion
people**

not a niche, but a continent

It started with

1 Hypothesis

Neurodivergent Brains

- **Social Queues**
- **Ambiguous Language**
- **Facial Expressions**

NUL

No more guessing.
Now I know.

Autism • ADHD • Neurodivergent minds

Where language Fails, **NUL** succeeds.

NUL: **a real-time translator**

(added on smart devices and
-glasses + online meeting tools)

Creating Context

before, during, and after every interaction

How?

- 1) **Facial Expression
& Social Cue
Software**

How?

2) Ambiguous Language

How?

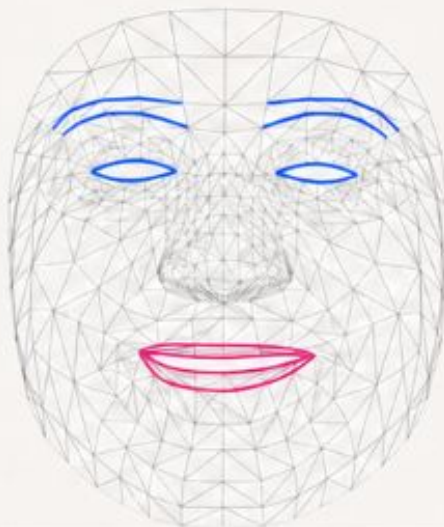

3) Cognitive Context

NUL v0.9 IPHONE

● AI ● MIC ● REC

HAPPINESS

Serious tone.
Supportive. Indirect.

NEUTRAL

Attention shifted.

**NUL SEES
THE SHIFT.
BEFORE YOU
HAVE TO GUESS.**

Where?
It runs on
smart
devices.

**Do you have
the time?**

**Your goto answer
wouldn't be 'YES'
anymore.**

**When someone
says:**

‘You look great’

you won’t think:

**‘What’s wrong with
what I’m wearing?’**

**So:
the first chat
you have
in the day
wouldn't be
with the
END BOSS.**

**thank
you**

Where language Fails, **NUL** succeeds
